

Alternative paint boards

You can modify your board layout by playing with **the Paper tiles**.

Choose one of the configurations below.

Place your Paper tiles on the indicated spaces. **These act as placement constraints:** you will not be able to place Landscape tiles on these spaces.

The rest of the rules remain unchanged, but some alternative paint boards have specific features explained below:

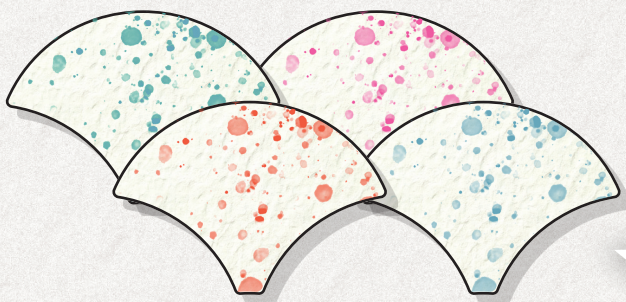

Alternative paint board 1:

On this board, there is **only one end-game space** (darker space). As soon as an Artist places a tile on this space, the game ends. Complete the current round until you reach the Artist with the starting player token.

Alternative paint board 3:

On this board, the second row that allows you to claim Seals **can only contain 2 tiles**. Place 2 Landscape tiles of different types there to claim one of the 2 corresponding and available Seals.

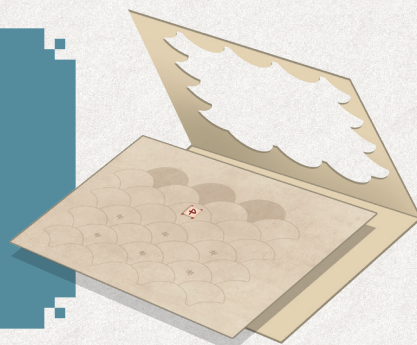

Clarification for the boards: You can place tiles on your board as long as **they are supported** according to the standard rules, including by Paper tiles.

You can also create your own alternative boards by agreeing on which spaces to place your Paper tiles.

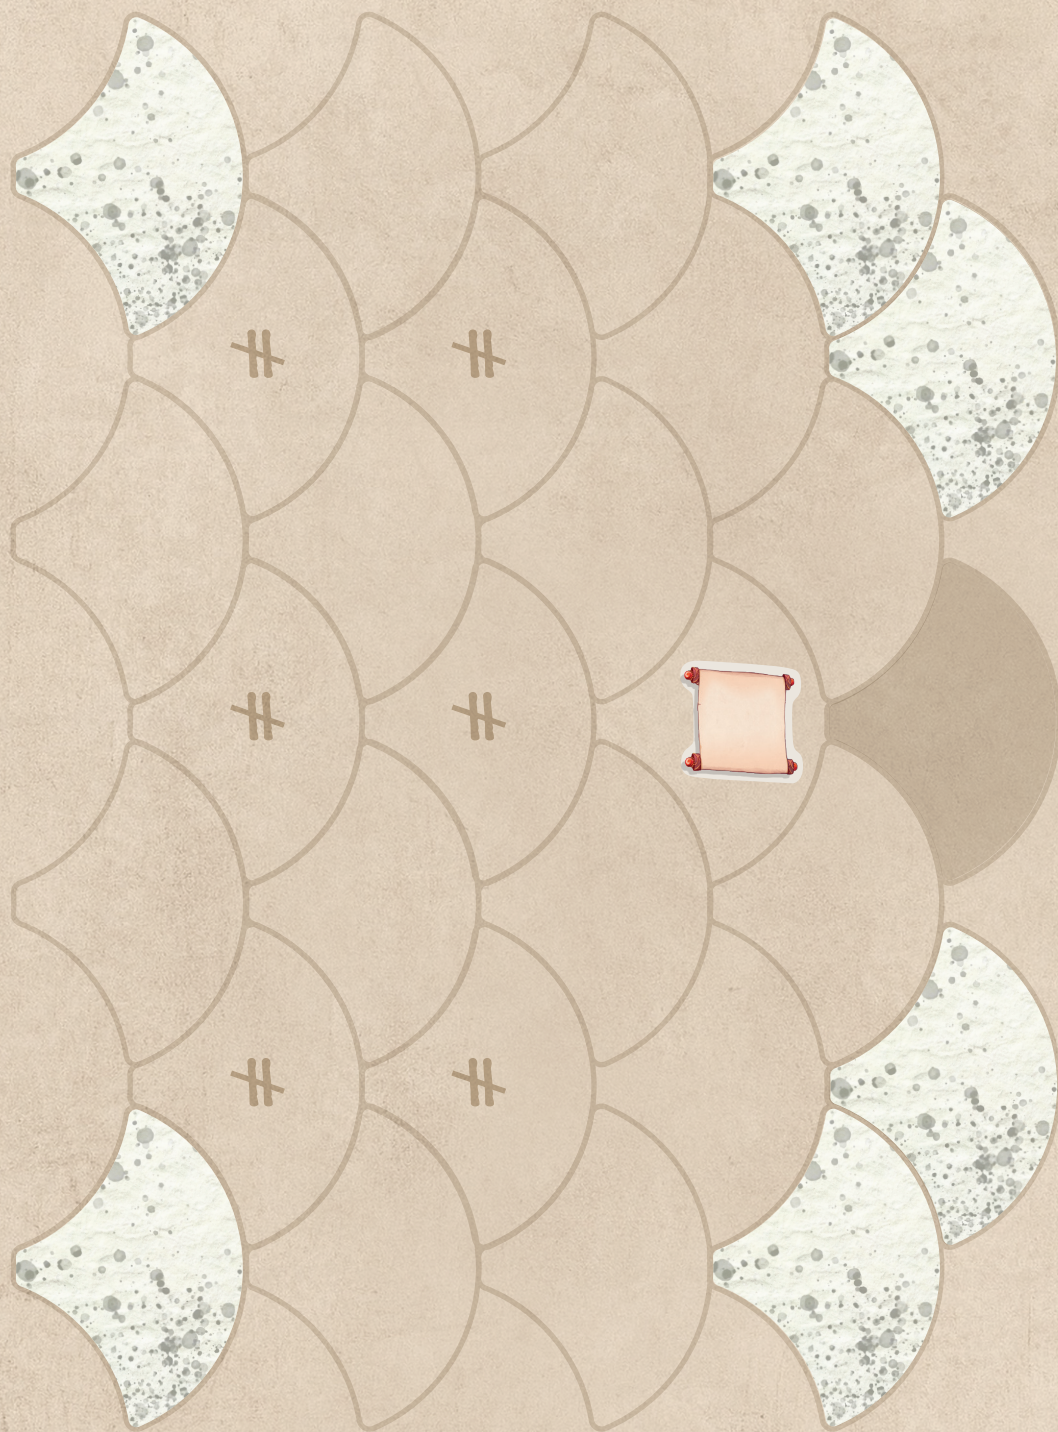

Print and slide the alternative boards below into your Paint board.

All Artists must play with the same board configuration.

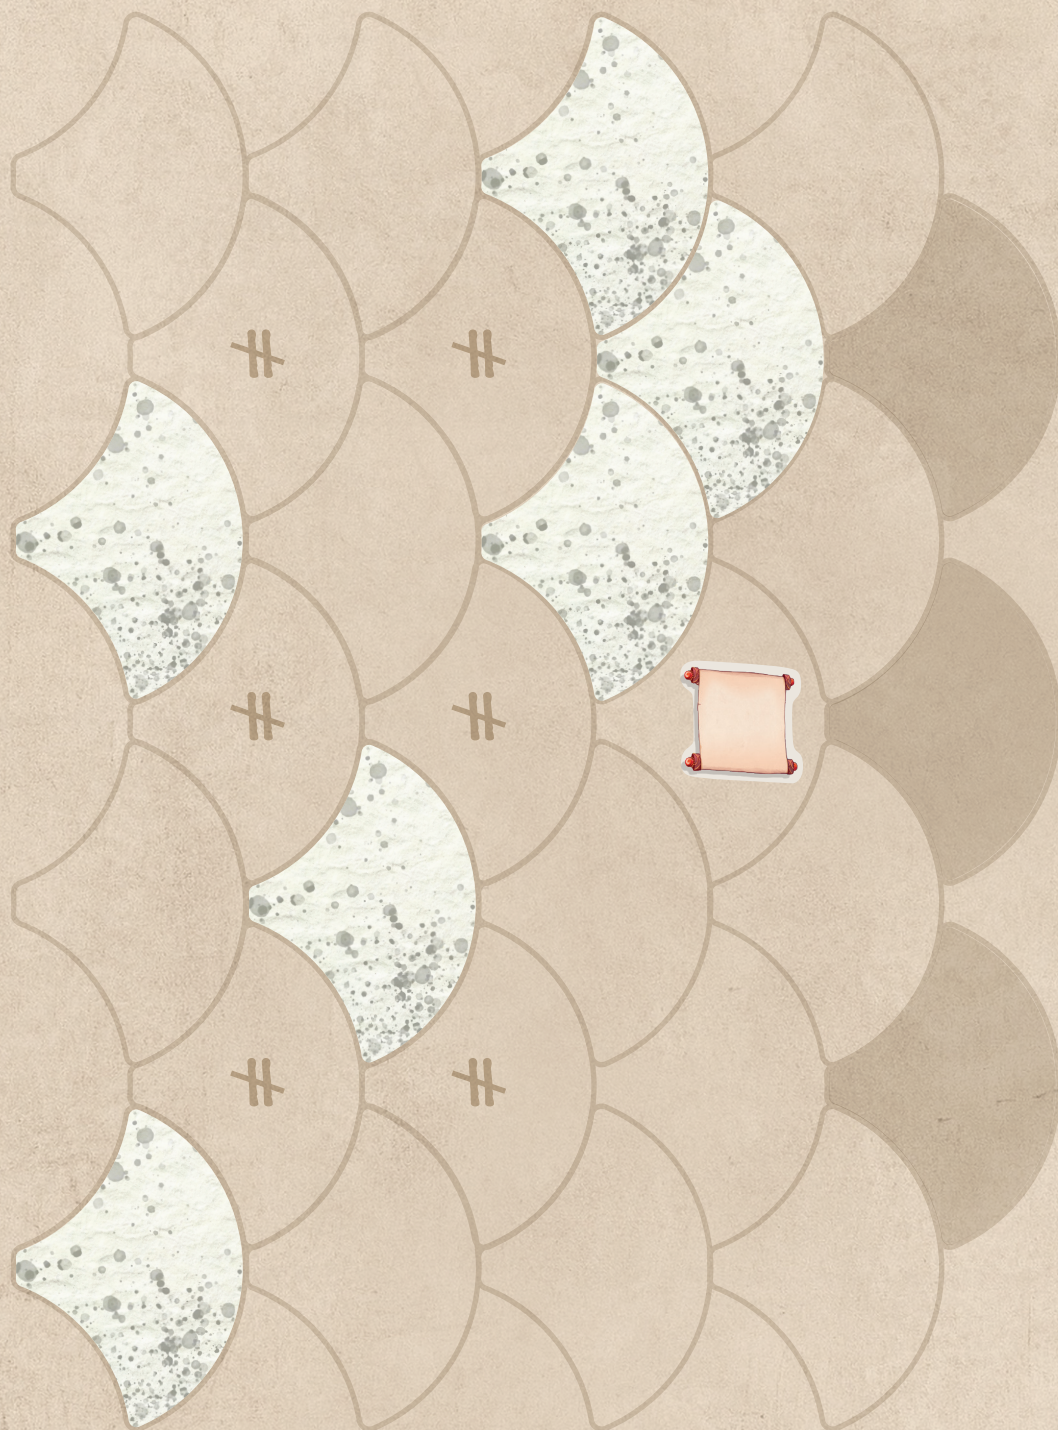

Print at 100% scale: 1 copy of the board per Artist.
You can print the boards double-sided by printing pages 2 to 4.
Cut them out along the dotted lines.
